EDUCATION

National University of Singapore (NUS)

Aug 2025 – Present

- Bachelor of Computing in Computer Science (Honours), GPA: 4.25/5.0
- Relevant Coursework: Programming Methodology I & II, Discrete Structures, Linear Algebra

Anderson Serangoon Junior College

Jan 2021 – Dec 2022

- Rank Points: 86.25/90 (4 Distinctions)

SKILLS & CERTIFICATIONS

Programming Languages: Java, Python, C, JavaScript, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, SQLite, Pandas, NumPy, Scikit-Learn

Technologies: Git/GitHub, Railway, Heroku, Google Cloud Platform (GCP), Jira

Certifications: Google Professional Machine Learning Engineer, CS50X, CS50P

EXPERIENCE

Technical Operations Intern (Business Management) — Aimazing

Jan 2025 – Jun 2025

- **Spearheaded the technical deployment** of 500+ IoT/hardware devices across tier-1 commercial hubs (ION Orchard, VivoCity), designing **agile Jira workflows** to synchronize engineering, logistics, and client onboarding
- **Triaged and accelerated** the resolution of 200+ technical support tickets, acting as the **primary QA liaison** between clients and software engineering teams to diagnose **edge-case device errors** and **validate software patches**

PROJECTS

Lounge Booking Telegram Mini App | Node.js, Express, SQLite, Railway

Feb 2026

- Engineered a **full-stack Telegram Mini App** to digitize facility bookings for **130+ active users**, featuring a mobile-responsive interactive calendar and **concurrency-safe** multi-hour slot selection
- Designed and integrated a relational **SQLite database**, ensuring **100% data persistence** and zero downtime by configuring mounted cloud volumes on **Railway**
- Resolved a critical **64-bit integer overflow vulnerability** faced by 40% of users, caused by massive Telegram IDs by enforcing strict string-casting and data sanitization prior to database insertion
- Implemented secure **Role-Based Access Control (RBAC)** via server-side environment variables, enabling dynamic admin privileges and **proxy-aware API rate limiting** to mitigate abuse

Personal Portfolio Website | gabrielwan.me | HTML/CSS, JavaScript, Git

Dec 2025

- Architected a responsive, **mobile-first single-page application (SPA)** to showcase technical software projects
- Established a **continuous deployment (CD) pipeline** via GitHub Pages, managing version control and code reviews using Git
- **Optimized frontend assets** and implemented custom CSS animations to **reduce render-blocking resources** and improve load times

Angels & Mortals Telegram Bot | Python, Google Sheets API, Heroku

Sep 2025

- Maintained and enhanced a **legacy Python codebase** serving **130+ active users**, collaborating with a team of 5 to deploy new features and bug fixes
- Engineered secure data pipelines using the **Google Sheets REST API** to replace a deprecated local storage system, working within the existing architecture to resolve **critical data loss issues**
- **Refactored server-side execution logic** to improve system stability and **memory allocation** on Heroku, minimizing downtime during high-traffic request spikes

CO-CURRICULAR ACTIVITIES

NUS College of Alice & Peter Tan

Aug 2025 – Present

- **ICG Squash Captain (2026):** Led the 2026 Inter-College Games for a competitive squad of 7 players by designing technical training schedules and formulating match strategies
- **CAPT in Silence:** Collaborated with 20 participants to engage directly with the Deaf community to promote inclusivity
