EDUCATION

National University of Singapore (NUS)

Aug 2025 – Present

Bachelor of Computing in Computer Science (Honours), GPA: 4.25/5.0

SKILLS & CERTIFICATIONS

Programming Languages: Java, Python, C, JavaScript, HTML, CSS

Frameworks & Libraries: Node.js, Express.js, Fastify, Pandas, NumPy, Scikit-Learn

Technologies: SQLite, ClickHouse, Git/GitHub, Railway, Heroku, Docker, Jira

Certifications: Google Cloud Professional Machine Learning Engineer Certification

EXPERIENCE

Technical Operations Intern (Business Management)

Jan 2025 – Jun 2025

Aimazing (Retail Tech & Data Analytics)

- **Spearheaded the technical deployment** of 500+ IoT/hardware devices across tier-1 commercial hubs (ION Orchard, VivoCity), designing **agile Jira workflows** to synchronize engineering, logistics, and client onboarding
- **Triaged and accelerated** the resolution of 200+ technical support tickets, acting as the **primary QA liaison** between clients and software engineering teams to diagnose **edge-case device errors** and **validate software patches**

PROJECTS

[Community-Powered Emergency Fund \(HackOMania 2026\)](#) | TypeScript, Fastify, ClickHouse, Interledger Mar 2026

- Built an automated disaster relief platform using TypeScript and Fastify that matches live USGS/NWS disaster signals with affected users via **sub-millisecond geospatial queries** in ClickHouse
- Integrated **Interledger Open Payments** for instant, non-custodial fund distribution and implemented a **SHA-256 hash-chained audit log** for tamper-proof transaction tracking

[Lounge Booking Telegram Mini App](#) | Node.js, Express.js, SQLite, Railway

Feb 2026

- Developed a full-stack Telegram Mini App using Node.js and Express.js to digitize facility bookings for **130+ active users**, featuring an interactive calendar and concurrency-safe slot selection
- Ensured **zero-downtime data persistence** by deploying an SQLite database via Railway cloud volumes, and secured the app using **role-based access control (RBAC)** and API rate limiting
- Resolved a critical **64-bit integer overflow** bug affecting **40% of users** by enforcing strict string-casting on massive Telegram IDs before database insertion

[Personal Portfolio Website](#) | HTML/CSS, JavaScript, Git

Dec 2025

- Built a responsive, **mobile-first single-page application** to showcase technical projects
- Optimized frontend and implemented custom CSS animations to **reduce render-blocking** and improve load times
- Managed version control via Git and deployed the site using GitHub Pages for seamless **continuous delivery**

[Angels & Mortals Telegram Bot](#) | Python, Google Sheets API, Heroku

Sep 2025

- Maintained and enhanced a legacy Python codebase serving **130+ active users**, collaborating with a team of 5 to deploy new features and bug fixes
- Engineered secure data pipelines using the Google Sheets REST API to replace a deprecated local storage system, working within the existing architecture to resolve **critical data loss issues**
- **Refactored server-side execution logic** to improve system stability and **memory allocation** on Heroku, minimizing downtime during high-traffic request spikes

CO-CURRICULAR ACTIVITIES

NUS College of Alice & Peter Tan

Aug 2025 – Present

- **Garuda House Committee (Tech):** Contributed to the house community by developing digital tools and platforms to improve resident life
- **ICG Squash Captain (2026):** Led the 2026 Inter-College Games for a competitive squad of 7 players by designing technical training schedules and formulating match strategies
- **CAPT in Silence:** Collaborated with 20 participants to engage directly with the Deaf community to promote inclusivity
