EDUCATION

National University of Singapore (NUS)

Aug 2025 – Present

Bachelor of Computing in Computer Science (Honours), GPA: 4.43/5.0

SKILLS & CERTIFICATIONS

Languages: Java, Python, C, JavaScript

Technologies: Node.js, Express.js, Fastify, SQLite, ClickHouse, Git/GitHub, Docker, Jira

Certifications: Google Cloud Professional Machine Learning Engineer Certification

EXPERIENCE

Digital Transformation Intern

May 2026 – Aug 2026

Singapore Airlines Engineering Company (SIAEC), Ground Support Equipment (GSE)

- Built and live-tested a Microsoft Power Platform solution (Power Apps, SharePoint Lists, Power Automate) to digitalise GSE maintenance records and approval workflows
- Designed the application's data model and business logic for preventive maintenance scheduling, record validation, and automated due-date tracking
- Developed a Chrome/Edge extension that consolidated live telemetry for 295+ GSE assets into a searchable dashboard, reducing manual lookup across multiple portal pages

Business Management Intern

Jan 2025 – Jun 2025

Aimazing (Retail Tech & Data Analytics)

- Led deployment of 500+ IoT devices across tier-1 commercial hubs (ION Orchard, VivoCity), designing Jira workflows that aligned engineering, logistics, and client onboarding teams
- Managed client relationships and coordinated cross-functional teams to ensure seamless device rollouts, identifying and resolving process gaps to maintain project timelines

PROJECTS

[UWash \(Finalist, Top 8 — Student Life Hackathon 2026\)](#) | Python, Flask, React, ESP32

Mar 2026

- Engineered a full-stack IoT laundry monitoring system using ESP32 vibration sensors and a Python Flask backend, enabling real-time machine availability tracking across residential college laundry rooms
- Developed an asynchronous Telegram bot with automated push notifications and a digital queue system, eliminating manual status updates and reducing machine idle time for UTown residential students

[Community-Powered Emergency Fund \(HackOMania 2026\)](#) | TypeScript, Fastify, ClickHouse

Mar 2026

- Built an automated disaster relief platform using TypeScript and Fastify that matches live USGS/NWS disaster signals with affected users via sub-millisecond geospatial queries in ClickHouse
- Integrated Interledger Open Payments for instant, non-custodial fund distribution and implemented a SHA-256 hash-chained audit log for tamper-proof transaction tracking

[Lounge Booking Mini App](#) | Node.js, Express.js, SQLite

Feb 2026

- Developed a Telegram Mini App for 130+ active users to digitise facility bookings using Node.js, Express.js, SQLite
- Resolved a critical 64-bit integer overflow bug affecting 40% of users by enforcing strict string-casting on massive Telegram IDs before database insertion

[Angels & Mortals Bot](#) | Python, Google Sheets API

Sep 2025

- Migrated the bot from local storage to the Google Sheets API, eliminating critical data loss issues

CO-CURRICULAR ACTIVITIES

NUS College of Alice & Peter Tan

Aug 2025 – Present

- **Garuda House Committee (Tech):** Contributed to the house community by developing digital tools and platforms to improve resident life
- **ICG Squash Captain:** Led the 2026 Inter-College Games for a competitive squad of 7 players by designing technical training schedules and formulating match strategies
